Profile

Frontend engineer shipping production web and mobile interfaces across fintech, consumer, and marketplace products. At Kora Payment Infrastructure, build dashboards for African payment products. Also shipped Renova's live marketing site and member app surfaces, and owned Clutch's React Native customer and provider apps through production on iOS and Android. Strong on typed React, Next.js, React Native/Expo, and motion-driven UI that holds up in real use

PROFESSIONAL EXPERIENCE

- | | |
|--|------------------------------------|
| Frontend Engineer (Intern), Kora Payment Infrastructure 🔗 | 10/2023 – 2024
lekki,lagos |
| <ul style="list-style-type: none">• Built landing pages and internal microsities for company hackathons, product launches, and marketing campaigns using React and TypeScript.• Contributed UI components to internal tools under senior engineer guidance, learning the team's design system and code review standards. | |
| Frontend Engineer, Kora Payment Infrastructure 🔗 | 2024 – Present
lekki, lagos |
| <ul style="list-style-type: none">• Built and maintain React + TypeScript interfaces for an internal admin dashboard supporting a Korapay sub-product/team, used to manage transactions and operations for thousands of active merchants.• Optimised frontend performance through component refactoring and API call batching, cutting dashboard load times significantly.• Contribute to the internal design system, improving component reusability and reducing cross-team UI inconsistency. | |
| Mobile App developer, Clutch Energies 🔗 | 08/2025 – 02/2026
Lagos,nigeria |
| <ul style="list-style-type: none">• Implemented mobile development for a fuel delivery platform using React Native + Expo, covering rider and customer-facing apps with a team.• Integrated live pricing, order state machines, real-time tracking, and OTP-based authentication flows with backend APIs.• Coordinated backend engineering requirements ahead of UAT, producing detailed specs for payment idempotency, delivery scheduling, and push notification flows.• Shipped consistent cross-platform UI across Android and iOS, including a smart platform-detecting download flow on the marketing site. | |
